

Abstract:

2. This study explores the causes and consequences of school dropouts among young offenders in Spain, focusing on students aged (14-18). Using the School Dropout Inventory, data was collected from 264 participants and analyzed using SPSS. Findings revealed that academic difficulties (40%), family and socio-economic pressure (25%), and poor health (15%) were the leading causes of dropout. The consequences also include that are unemployment, juvenile crime, and mental health problems. Students also cited disengagement and lack of motivation from teachers. This study suggests that provide mental health support, reduce the education cost, implement the career-oriented education also modify the system management can solve this national crisis.

Revised Text:

This study explores the causes and consequences of school dropouts among young offenders in Spain, focusing on students aged 14 to 18. Using the School Dropout Inventory, data were collected from 264 participants and analyzed using SPSS. Findings revealed that academic difficulties (40%), family and socio-economic pressures (25%), and poor mental health (15%) were the leading causes of dropout.

The consequences also include unemployment, juvenile crime, and mental health problems. Students additionally cited disengagement and lack of motivation from teachers. This study suggests that providing mental health support, reducing education costs, and implementing career-oriented education can help. Moreover, modifying the system of management may assist in solving this national crisis.

Detailed Corrective Feedback:

1. Informal/Nonacademic Elements:

- "solve this national crisis" → acceptable in persuasive essays but consider rewording to a more neutral tone in academic writing: "address this issue on a national level."

Detailed Corrective Feedback:

1. Informal/Nonacademic Elements:

- "solve this national crisis" → acceptable in persuasive essays but consider rewording to a more neutral tone in academic writing: "address this issue on a national level."
- "students also cited disengagement..." → "cited" is appropriate, but avoid repeating "also" too frequently.

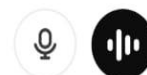

2. Verb-Related Problems:

- "data was collected" → should be "data were collected" because "data" is plural.
- "and Analy-ed data SPSS" → should be "and analyzed using SPSS" (corrected spelling and grammar).

3. Spelling:

- "Analy-ed" → incorrect; should be "analyzed."
- "provide" (near end) → grammatically correct but needs to be "providing" to maintain parallel structure.

4. Punctuation:

- "(40%), family and socio-economic pressure (25%)..." → keep punctuation consistent and appropriate.
- Missing commas and periods were corrected throughout for clarity.

5. Capitalisation:

- "Using the school Dropout Inventory" → "School Dropout Inventory" (capitalize proper noun).

6. Preposition Use:

- "collected from 264 participants and Analy-ed data SPSS" → Correct preposition and structure: "analyzed using SPSS."

7. Wrong Word Form / Wrong Word:

- "pressure" → should be plural: "pressures."
- "system management" → unclear; better to say: "system of management" or "educational administration."

8. Missing Word:

ChatGPT

8. Missing Word:

- "reduce the education cost" → should be "reduce the cost of education."

9. Sentence Structure / Awkward Phrasing:

- "Students also cited disengagement and lack of motivation from teachers." → grammatically okay but could be restructured for clarity: "Students also reported feeling disengaged and unmotivated due to lack of support from teachers."

10. Sentence Quality / Redundancy:

- Avoid unnecessary repetition of "also," "include that," and similar phrases.
- Replace "modify the system management" with something more specific, like "reform the education management system."
