

# Junior Software Engineer

Dhaka, Dhaka, Bangladesh

## About the job

### Company Description

We suggest you enter details here.

### Role Description

This is a part-time remote role for a Software Engineer. The Software Engineer will be responsible for developing and maintaining back-end web applications, designing and implementing software solutions, programming, and applying object-oriented programming (OOP) principles. The Software Engineer will also work collaboratively with other team members, participate in code reviews, and ensure the quality and performance of software applications.

### Qualifications

- Expertise in Computer Science and software development principles
- Experience in Back-End Web Development and Software Development
- Proficiency in Programming and Object-Oriented Programming (OOP)
- Strong problem-solving and analytical skills
- Ability to work independently and remotely
- Experience with version control systems (e.g., Git) is beneficial
- Bachelor's degree in Computer Science, Software Engineering, or related field is preferred
